Highlights: The Brainy's train is a learning tool for primary school students in improving their spelling in English word. This tool will help student to identify English words by spelling the word correctly and applying new word directly. By using modification of train, it will attract students' attention to learn spelling in English word and at the same time they will create positive vibe among their friends and teacher.

Key words: English education, knowledge of English, primary school students

Introduction

The Brainy's train is an effective learning tool which is created to help student in English subject for primary school. Most students are unable to spell English words and it cause big problem to students especially it related to reading, writing and vocabulary development. Therefore, The Brainy's train is a tool that can attract their attention to learn English language and have fun when exploring their activities.

Moreover, the Brainy's train also proven that it can help students in improving their visual techniques. This learning tool is a new invention game to make teaching spelling in more attractive ways.

The Brainy's train also has a flashcard that contains memory spelling pattern that only relies on understanding linguistic concepts and help student to recognize English word. This will be demonstrated by teachers and students. To make this tool function effectively, it also has manuals explaining how to play The Brainy's train correctly.

How The Brainy's train work

There are 3 stations for train to be stopped. Firstly, student needs to press "on" button at starting point. The train will start moving.

At station 1, student needs to pick one bag from the first wagon as to solve the picture puzzle. The student needs to choose one picture and they need to arrange the picture correctly based on what they observe.

This activity, students is able to recognize verb by representing the picture that always use in a daily life for example eating, studying, running and ect.

At station 2, student need to arrange the letters from the second wagon to form the words based on the chosen picture puzzle.

By using this activity, students will able to familiar with English word by matching pictures and words correctly in order to improve their spelling.

At station 3, student will use the "doh" to write the words from the third wagon. This activity is need student to apply new word that is learning just now by writing it using the "doh". At the same time, it will help student to memorize the words they have learnt.

Contents

Advantages

- Specially designed to help cognitive growth which is students have to think quickly on how to spell the words
- This learning tool also prepared immediate feedback as students can check the correct spelling behind that picture
- It was designed as a motivation for students because it promotes a sense of achievement for students. They will compete each other to achieve high score.

Important to education

- Teachers: As a new method to attract their attentions to learn English language instead using a textbook
- Students: Help students to visual the concept of spelling and also make the learning process in attractive way as students will get immediate feedback at the end of the activities

Commercial value

- Can be commercialize by promoting The Brainy's train to the school especially for the primary students

Acknowledgement (if any)

The authors would like to thank the School of education Universiti Teknologi Malaysia for their support in making this project possible by preparing the innovation exhibition as a platform for us to promote this project to others
